PARTICIPANTS NEEDED FOR CONCUSSION RESEARCH

Are you a healthy individual who has not had a concussion?

If so, please consider volunteering for a study on dynamic balance, multi-modal task, vestibular activation and reaction time.

Your participation will involve a single (1 hour) visit where you will do balance tests in each of the four categories and complete a rate of perceived exertion questionnaire (RPE):

Standing
Balance

Vestibular
activation

Upper Body
Reaching Task

Lower Body
Reaching Task

RPE
Questionnaire

Mitacs
