HOW DOES VIRTUAL TOUCH IMPACT BALANCE CONTROL?

Are you a healthy adult between the ages of 18 to 35 or a healthy adult above 60 years old? If so, you may be eligible to participate in this study.

This study examines how different forms of touch impact balance.

As part of this study, you will stand under various conditions where the feedback received by the tip of your finger is modified. The testing session will last approximately 120 minutes.

If you would like to be a part of this study, please scan the QR code below or contact the student researcher via email at seaneoin.obyrne@usask.ca
